HOW THE SYSTEM WORKS

The ColorPlus System consists of a 100% acrylic Neutral Concentrate (available with or without sand) and the ColorPlus Pigment Dispersion. What is truly remarkable about the ColorPlus System is the fact that only 2 gallons of ColorPlus pigment are needed to colorize an entire 30 gallon keg of Neutral Concentrate.

EASE OF MIXING

ColorPlus is a highly concentrated pigment dispersion that disperses readily in Neutral Concentrate. Our proprietary technology enables ColorPlus to disperse completely with minimal mixing.
